Action Item # 02

Presentation Section/Subject Area: Functional & Block Diagrams vs. Phases

SPECIFIC REQUEST:

Need an overall functional block diagram illustrating the functional capabilities and a data flow diagram showing the various data flows, with the differences among the I&T (pre-launch w/GSE) phase, L&EO phase, and nominal on-orbit phase configurations specified. Diagrams for each phase might be needed. In the review I was frequently very confused on the relationship of among the members of the LAT and ISOC teams. Unclear many times who was the stakeholder and who was the developer etc.

REASON/COMMENT:
